"Casual Friday" Commentary

### Casual Friday: Update Q2 Material + New Purchase – July 12<sup>th</sup>, 2024

#### Updated Strategy Marketing Material:

[Dividend Strategy Guide 6.30.2024](#) - [Dividend Strategy Scorecard 6.30.2024](#)

[Dividend Strategy Factsheet 6.30.2024](#) - [Dividend Strategy Commentary 6.30.2024](#)

#### 6-25-2024 - Berkshire New Purchase: Nestle (NSRGY) - Source of Funds: Trimmed Microsoft (MSFT)

##### Nestle (NSRGY)

- Trading @ roughly 20% discount to average P/E
- 3.20% current dividend yield
  - Continuous annual dividend payments for ~65 years
  - Dividend growth for 30 years in a row
  - ~10% dividend growth expected
- ROIC trending toward 15%
- \$250B + market cap, AA- Credit – Ability to acquire, optimize and scale brands
- Multigenerational company, originally listed on Zurich exchange 10/25/1905
- Purina – Premium pet brand with double-digit organic growth
- L'Oréal – Nestle maintains 20% stake, attractive global brands

Risks include Supply disruptions, inflation in input costs (cocoa) and consumers "trading down". (Source: Bloomberg & [Nestle](#))

#### Second Half Rotation?

The CPI print, likely paired with valuations, stoked a massive growth / value rotation yesterday. A huge performance gap still exists YTD -- But yesterday growth was down - 2.11% and value was up +1.09%. It was a move reminiscent of Vaccine Monday... and now has us hoping, is a broader rotation finally underway? (Source: Bloomberg)

## **Incumbent Tech User, Beware...**

The future is officially here, why not deliver investment through the seamless and powerful technology brought by today's unified managed accounts (UMAs)? We were recently reminded of yet another application for UMAs -- winning business. An advisor we know landed a large prospect by poking at the glaring inefficiencies of another's technology/investment offering...

### **The incumbent advisor was using an old tech stack combining SMAs, mutual fund accounts and an advisor directed accounts:**

- Client felt like "data was all over the place" -- Multiple accounts, multiple statements (and multiple advisor platforms)
- Wash Sales -- One manager was selling for a loss, another manager was buying
- Client didn't feel they were rebalanced/buying equities quickly enough in 2020
- Client has taxes in mind, yet no clarity on a process to manage/minimize

This inefficient dystopian model made it difficult to capitalize and deliver on investment trends, tax efficiencies and rebalancing. After identifying the pitfalls -- The advisor we know painted a utopian picture of how leveraging an enhanced tech stack (UMA) would benefit:

- Consolidation of data/accounts/statements/performance reporting
- Tactical and timely rebalancing
- Tax efficiencies/avoidance of wash sales / automated tax-loss harvesting
- An investment strategy automatically flowing through to holistic financial plan tools

Imagine the inefficiencies in the incumbent advisor's practice... Are they a data manager or a wealth manager? Seriously -- Are they spending way too much time opening separate accounts, moving money around to rebalance, culling together performance data, monitoring 5 different cap gains reports and trying to make sense of it with clients as it pertains to their financial plan? Or they're paying someone to do all that work. In addition to losing business, for this advisor the lost time is an explicit cost to their practice and keeps him from delivering premium service.

We had two takeaways from the conversation:

#1. Leverage your tech stack in prospective client meetings, there are still plenty of advisors stuck in old ways.

#2. If you're an advisor stuck in your old ways, change -- because the modern-day advisor is coming after your book.

**One more anecdote from this advisor** – He keeps allocations and investment conversations simple: "Mr. and Mrs. Client we'll leverage the enhanced tech mentioned and align investments with your financial plan. We'll work to simplify and streamline your approach so we could make changes quickly..."

- Berkshire SMA aims to generate income, grow income and protect on the downside
- Growth fund "XYZ" to possibly find disruptive technologies with superior long term growth profile
- International ETF "ABC" because currently yields are high and valuations are lower
- Fixed income manager "XXX" aims to hedge against equity market risk and provide income

“Together they help align you with your retirement goal. Now let’s talk about your estate plan, and how much money you want to leave to your kids.”

1 account, 4 strategies, and a focused conversation around planning – Which for the majority of clients is utopian not dystopian

Have a great weekend!  
Gerry

*Definitions: The S & P 500 Index is a market capitalization weighted index of the largest 500 U.S. stocks. It is a market-value weighted index (stock price times # of shares outstanding), with each stock’s weight in the index proportionate to its market value. The index is designed to measure changes in the economy and is representative of most major industries. Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The index was developed with a base value of 200 as of August 31, 1992. Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The index was developed with a base value of 200 as of August 31, 1992. You cannot invest directly in an index. BEst (Bloomberg Estimates) Earnings Per Share (EPS Adjusted) estimate returns Earnings Per Share from Continuing Operations, which may exclude the effects of one-time and extraordinary gains/losses. Beta is a measure of volatility vs. an index. Upside/Downside capture ratios refer to a portfolios performance as a percentage of either positive returns (upside) or negative returns (downside) vs. an index. Standard Deviation is a measure of total risk. Alpha, Beta and capture ratios are represented as calculated by Morningstar.*

*Risks: Past performance does not guarantee future results. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for an individual’s investment portfolio. Dividends are subject to change, are not guaranteed, and may be cut. Investing based on dividends alone may not be favorable as it does not include all material risks. There is no guarantee any stated (or implied) portfolio or performance objective mentioned by Berkshire can be met. Berkshire’s equity style may focus its investments in certain sectors or industries, thereby increasing potential volatility relative to other strategies or indices. The dividend strategy may include bundled services also known as a “wrap fee program”. Because there is typically a low turnover in the strategy, this may be more*

*costly for some investors. No one should assume that any information presented serves as the receipt of, or a substitute for, personalized individual advice from a qualified advisor or any other investment professional.*
